At Hôpital de La Tour, we look after your health by providing the same level of care that we would want for ourselves and our loved ones. We all work toward one common goal:

**enabling those who trust us with their health care to swiftly reach the best quality of life.**

Our teams care for our patients with professionalism and compassion every single day. Providing the best expertise and care drives each of our 1,500 staff and physicians.

Your quality  
of life is our  
top priority

Our hospital is dedicated entirely to your health and our focus is on your well-being and that of your loved ones. We will look after you based on your specific needs while being mindful of the quality of life that you cherish and deserve.

In the spirit of this commitment, we strive to develop quality indicators and tools so that we can constantly assess the quality of care that we provide to our patients. We monitor our clinical outcomes on a daily basis to ensure that we continuously improve our services, and we are committed to doing everything possible for your health. Hôpital de La Tour thereby endeavors to move increasingly toward the highest standards of medical excellence, made possible by our unparalleled quality of care.

Your  
multidisciplinary  
care team

At Hôpital de La Tour, we strive to deliver the highest standards of care. As a result, a wide range of specialists will work together as a team to treat your medical condition. You will be looked after by a multidisciplinary team with specific expertise in your health condition to make sure that you receive the best possible treatment.

Our holistic approach offers you all the care you need to regain your quality of life. You will benefit from a personalized care pathway, coordinated by a team who delivers tailored support. Throughout your care journey with Hôpital de La Tour, we will take into account your health and progress as well as your needs and those of your loved ones.

**When I show my patient the images of his damaged knee, a physical therapist also attends the consultation. Physical therapists have different expertise to physicians and this enhances our assessment so that we are able to offer the best possible treatment to the patient.**

Dr. Finn Mahler, Sports Physician

# Personalized and long-term care

Hôpital de La Tour strives to make sure that you receive the highest standards of care based on your needs. You will benefit from a personalized care pathway, which begins with an assessment of your health and quality of life. If you then need to be admitted for inpatient care, this assessment includes everything we need to prepare for your stay as best as possible and will allow us to closely monitor your care. It will also aid your recovery in the short, medium, and long term while helping you regain your quality of life.

We have more than 30 medical specialties on site to make sure that you receive comprehensive and coordinated health care with quick and direct access to all the specialists you may need.

**Superb admissions process, very professional. The medical and care team who looked after me was very reassuring, it was made up of competent and caring professionals. I received personalized support tailored to my needs, which made my hospital stay as comfortable and pleasant as possible.**

Training,  
a commitment  
to innovation

We care deeply about training. It is a major source of motivation for our teams and a tremendous incentive for learning about the latest medical advances in order to meet the demands of the Swiss institute for postgraduate and continuing medical education. We play an active role in training the next generation of physicians. By helping to maintain and develop expertise, we increase our commitment to a high standard of care for our patients.

Research  
for a gold  
standard in care

Clinical research contributes to the continuous improvement of care and to the development of ever more advanced courses of treatment to improve your quality of life. It helps us to constantly adapt to your specific needs as well as your lifestyle, and supports us in developing medical excellence based on scientific evidence. Combined with the experience and expertise of our physicians, research helps us to optimize your care pathway and continuously adapt to treatments through the data that we collect. The quality of your care is driven by research projects, which we are able to carry out thanks to the involvement of former patients of Hôpital de La Tour. Your trust is therefore just as crucial as the expertise of our teams.
